

Asnuntuck Community College Transfer Student Outcomes Data Source: NSC

In March 2020, student names of 6 cohorts between Fall 2013 and Fall 2019 semesters were sent to National Student Clearinghouse (NSC). A study was conducted to analyze transfer patterns for cohorts 2013 to 2017 within 3 years, and for cohort 2013 to 2015 for transfer patterns within 5 years of attending ACC.

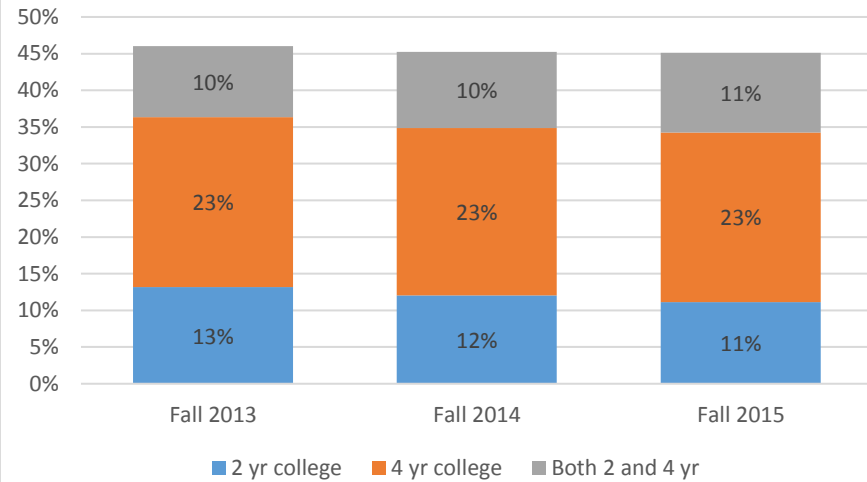

- 39% of ACC students transferred to a 2-year or a 4-year institution within 3 years, with 25% landing at 4-year institutions.
- For those data available up to 5 years, 45% of ACC students transferred to a 2-year or a 4-year institution within 5 years, with 33% landing at 4-year institutions.
- 85% of ACC students that transferred to 2-year institutions landed at one of the following seven community colleges: Manchester Community College, Capital Community College, Springfield Technical Community College (MA), Tunxis Community College, Middlesex Community College, Holyoke Community College (MA), and Naugatuck Valley Community College
- 56% of ACC students that transferred to 4-year institutions landed at one of the following seven colleges and universities: UConn, CCSU, Westfield State University (MA), Bay Path University (MA), ECSU, Goodwin University, and Elms College (MA).

Next step is to look into transfer patterns by ACC academic programs for those students with a transfer record.
